

Minerva

Nexplore Minerva is a digital tool that brings control into your supply chain.

With rising costs, increasing sustainability obligations and a global push towards digital transformation, effective contractual management is essential.

Minerva can be used by any company needing to manage the contracts with subcontractors, vendors, and suppliers.

Key Benefits

Monitor performance and progress

Track the progress of your project in real time.

Control over changes

Keep track of all changes to your supplier and subcontractor contracts.

Control over your payments

Only pay for the work that has actually been carried out.

How can Minerva help your business?

Saving resources

Reduce administrative expenses with a centralized system.

Avoid conflicts

Save time and money through real-time transparency for all project participants, predefined processes, and notifications at every step of the process.

Integrated ESG reporting

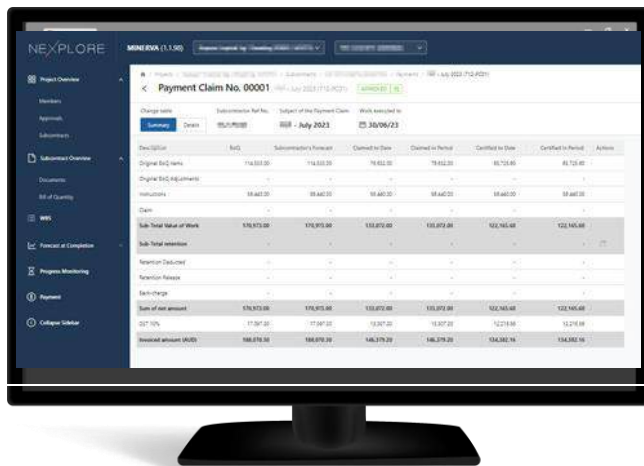

Achieve your sustainability goals by capturing ESG relevant data based on the volumes documented in Minerva.

Stay in control of all your subcontracts

NEXPLORE

Manage all your contracts

Monitor changed contract value, variations, progress and claims

Corporate Reporting

Nexplore Minerva integrates into your company BI reporting via open API

ERP Integration

Exchange data between Minerva and your company's ERP system in real-time
